Erdős, Paul
Some of my favourite problems in number theory, combinatorics, and geometry.
(In English)
Resen. Inst. Mat. Estat. Univ. São Paulo 2, No.2, 165-186 (1995).
[ISSN 0104-3854]

From the introduction: "I wrote many papers on unsolved problems and I cannot avoid repetition, but I hope to include at least some problems which have not yet been published. I will start with some number theory." Here P. Erdős presents another 14 problems in number theory, 16 problems in combinatorics and 10 problems in combinatorial geometry in his famous style. A rich source of inspiration with a list of 61 references to what has been achieved so far.

O.Ninnemann (Berlin)

Classification:
11-02 Research monographs (number theory)
05-02 Research monographs (combinatorics)
52-02 Research monographs (convex and discrete geometry)
00A07 Problem books

Keywords:
number theory; problems; combinatorics; combinatorial geometry
