Pach, János

Two places at once: A remembrance of Paul Erdős. (In English)

Math. Intell. **19**, No.2, 38-48 (1997). [ISSN 0343-6993]

This is a story about Paul Erdős as a mathematician and as a man. The author knew him personally for many years (in fact since his, i.e. the author's, childhood). One finds there a lot of interesting facts, observations, even anecdotes.

R. Murawski (Poznań)
